Bengaluru, Karnataka, India

Summary

I'm a 3rd Year student at Manipal Institute of Technology, interested in building practical software and machine learning systems. I've been working with Python, C++, SQL, and tools like Scikit-learn, TensorFlow, XGBoost, FastAPI, Flask, Docker, and Git. I enjoy working on projects end-to-end — from cleaning and preparing data, building and evaluating models, and tuning them, to turning them into usable applications and APIs. I'm also actively improving my DSA and problem-solving skills, with 100+ LeetCode problems solved. Currently looking for opportunities where I can work on real engineering/ML problems, contribute to a team, and keep getting better at building things that actually work.

Education

Manipal Institute of Technology

Bachelor of Technology - BTech, Information Technology · (August 2024)

St. Joseph's College, Allahabad

Computer Science · (April 2022 - May 2023)
